

STONY PLAIN SUN.

VOLUME 3.

STONY PLAIN, ALBERTA. THURSDAY, NOV. 23, 1922.

WHOLE NUMBER 121

Did You Ever Stop to Think What a CAN OF CREAM Will Do? Just Listen:

One Can will buy a Milch Cow.
One Can will buy a large Aluminum Kettle.
One Can will buy a Heater.
One Can will buy a Gasoline Lamp.
One Can will buy 120 lbs. of Sugar.
One Can will buy an Auto Tire.
One Can will Paint a small house one coat.
One Can will buy 4 pairs good Skates.
One Can will buy 3 sacks of Best Flour.
Two Cans will buy a large Linoleum Rug.
Two Cans will buy a good Washing Machine.
Two Cans will buy a good Suit.

BRING YOUR CREAM TO

C. W. ROSSELL.

AGENT FOR BURNS' CREAMERY.

On the Side.

Since the approach of cold weather, residents of the business section have noticed a proneness on the part of certain residents to deliver open-air addresses—in fact, these have become almost a weekly occurrence. The first was on Halloween week, when Don tried to tell an ex-friend where he got off. The next week a verbal encounter is said to have taken place between Honest Bill and Peggy; while the third in the gabfest series occurred last week, between Mike and Jim. The subject matter of the latter debate proved very interesting; and the auditors present say Mike is some teller. We understand, however, the local debating society is feeling the competition very keenly, and it is probable a bill will be put thru the next Mock Parliament limiting these privileges to members.

With the reported shooting of a man near Athabasca (the third in Edmonton district this season) in mistake for a deer, the old slogan used in the Parry Sound hunting grounds holds good here: "No big game hunter's outfit is complete without a few shipping tags indicating where to send the remains."

Stony Plain, the Good! Religious services conducted in four different places in town at the same time on Sunday afternoon last, speaks well for this burg, and makes a record hard to beat for the size of the place.

Electric Lights for the Town.

Following a special meeting of the Council on Tuesday of last week, when representatives of the Canadian General Electric Light Co. were present, to explain the details of installing an electric lighting system for the town, another meeting was called on Wednesday evening, the 15th, when a proposition was presented by Mr. Armbruster to light Main street with five electric lights and give the means of providing lights for private users in the 4 downtown business blocks. The town was asked to purchase and install the street equipment at a total cost of about \$1200—with an alternative offer of \$900, if the town buys the poles, sticks 'em up, and strings the wires, the promoters to provide the other necessary equipment.

The generator is to be installed in the Armbruster factory; as Mr. Armbruster intends, in any event, lighting his premises with electric lights.

The Councilors gave the proposal the "once-over" a couple of times, and then decided to adjourn the debate until Monday, the 20th.

A representative delegation of Main street ratepayers greeted the Councilors when they met Monday night to discuss the lighting proposition. Mr. Rossell expressed himself as not being favorable to the special assessment of the ratepayers in the four Main street blocks. Mr. John H. Miller gave an outline of his effort to supply electricity for Main street patrons and street lights. Mr. E. Summerfeld also expressed an opinion on the proposition, after

LOCAL NEWS.

Station Agent McCulla has returned from his trip East.

Mr. W. Austin is now on a business trip to Wayburn, Sask.

Mr. Loxey returned Saturday from a trip to Edson and B. C. points.

Fred Doenbush and a bunch of mill hands left for Styal on Saturday afternoon's train, to work.

Mr. Bishop, contractor, returned to Stony on Friday, from Mandare.

The Starrett family moved back yesterday, to their home at Wabamun.

Mr. Geo. S. Wolf of Wolf Brook has gone south for the winter.

Mr. Falkner, a valued member of the Bank of Commerce staff, has been transferred to Vermillion. His friends gave a party in his honor Tuesday night, and he left yesterday for his new position.

Mr. and Mrs. Vogt returned yesterday to their home in Strathcona.

The Misses Olson and Olson, students at Stony Plain High School, have moved to Edmonton, to pursue their studies.

Mr. and Mrs. Ed Summerfield have taken up their residence on Fifth street west.

Mr. J. B. Williams gave a very stirring address in Ducholke's Hall, Sunday afternoon, under the auspices of the International Bible Students, which was greatly appreciated by those present.

Wed., Nov. 22, 11 a. m.—high tide in water tank, 4' 8 1/2".

Special services were conducted in the Methodist Church on Sunday afternoon last, by Prof. S. Laycock of Alberta College. Special music was rendered by the choir.

A complete list of those eligible to vote at the forthcoming municipal election in Stony Plain is now hanging in the local postoffice, see if your name is on.

The muskrat season does not open until December 1.

John Kotchinsky has brought down his sawmill from Carvel, and is setting it up on the Geo. Liebert place, at Inga, where he expects to cut 100,000 feet of lumber.

When the Soldan farm was offered by auction, in front of the P. O. on Saturday, it is understood the reserve bid was not reached.

At the auction on Saturday last at the Town Hall, of the two school vans and two sleigh vans. The motor bus was bought by J. A. Barrie of Edmonton Beach for \$103; a covered van brought \$75; and the sleigh vans \$19 and \$20 apiece.

which a general debate continued for an hour.

After the delegation withdrew, a resolution carried "That Council proceed to get information re electric lighting complete and to get in touch with city electrician, upon Main street, and further for whole town."

Immigration And Settlement

Prominent Canadians recently returned home from visits to Great Britain have been giving public expression to their views on the subject of immigration to Canada, and one and all have referred to the opportunity which now presents itself to Canada of obtaining thousands of the very best type of British emigrants if only the right policy is adopted by this country and an energetic effort put forth to direct the steps of these people Canadianward.

It is universally agreed that hundreds of thousands of people in the British Isles must migrate annually, and that Canada can obtain the best of these people if they are gone after and looked for in the right way. At the present time, however, the eyes of the majority of these intending British emigrants are turned towards Australia and New Zealand, rather than towards Canada, and it is reported that considerable amazement prevails in England and Scotland that Canada should be neglecting such an opportunity of obtaining good settlers when, admittedly, this Dominion is so badly in need of population.

Probably the Federal Government is working out a new and comprehensive immigration policy. At least it is to be hoped so. But in the meantime Canada is losing tens of thousands of new settlers which might be obtained, and it must be realized that every British immigrant to Australia or New Zealand becomes an additional inducement for others to go there and join friends and relatives rather than come to Canada, just as every one coming here is apt to influence someone else to come.

We have advanced the argument that, so far as the Canada Colonization Association is concerned, it cannot do better work at the present time than to immediately apply its declared policy of "assisting settlers to make good" to those already in this country who are located on land unsuitable for successful agriculture, and actively interest itself in the removal of these farmers to other and more suitable locations. We adhere to that view, and likewise approve the decision of the Government to grant extra homesteads to men who find they cannot make a success of their present holdings.

But while this work of relocation is being proceeded with, the Government should not neglect the opportunity which is now theirs of encouraging the right type of British emigrants to choose Canada in preference to any and all other countries. Nevertheless, the almost universal opinion seems to be that this opportunity is not being grasped as it ought to be.

Greater care must, however, be exercised in future in the location of immigrants on the land. In the past, with millions of acres of arable land conveniently near to existing lines of railway, immigrants were located in colonies long distances from means of transportation with the result that they have been, and still are, unable to make a success of farming because of the prohibitive cost of getting their crops to market. They find it useless to raise large crops because the cost of hauling their products to market is greater than the price that can be realized. These settlers may not face starvation, because the land will produce their own food, but they lack ready money and are making no progress.

Such settlers are not active agents in adding to the volume of traffic so sorely needed by our National Railways in order to make that system a financial success. Yet if they had been located nearer those railways, both they themselves and the railways would have benefited and prospered. This is a lesson which should not be lost on our immigration authorities in connection with all future settlement.

Apart from the excessive cost of getting their crops to market, these farmers in isolated districts have to pay exorbitant prices for all needed supplies, and when it comes to threshing time the cost of securing the services of outfits also operates to destroy profits and to render the cultivation of increased acreages impossible.

In connection with the relocation of present settlers, as well as the location of incoming settlers, every effort should be put forth to populate the vacant lands now reasonably near existing lines of railway. The West needs a more intensive settlement of people within the radius of existing transportation facilities, rather than a further spreading out of scattered settlements.

Such a Bore

Life must become extremely dull for a woman who married a man to reform him, when she finds that she has succeeded.—Albany Journal.

There is no poisonous ingredient in Holladay's Corn Remover, and it can be used without danger or injury.

Diplomacy

It was evidently her first visit to the great emporium and she was not fleetingly embarrassed.

"I—or—wish to—look at some—er—false hair," she stammered.

"Very well, miss," rejoined the diplomatic salesman. "What shade does your friend desire?"

Wheat Movement Breaks Record
History was made on the last day of October in the movement of Western Canada's big wheat crop. The receipts on Winnipeg Grain Exchange that day were the greatest for any one day in the history of the Dominion, the total number of cars inspected being 2,821. The grain is of high quality, less than ten per cent. falling below number three northern, while the greatest volume is number one northern.

MOTHER!

Open Child's Bowels with
"California Fig Syrup"

Hurry mother! Even a sick child loves the "fruit" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary. "California Fig Syrup" is your druggist for genuine. You must say "California" or you may get an imitation fig syrup.

The Sundew plant family have glands containing a secretion that dissolves insects.

Reduced Freight Rates On Grain

Estimated That Fourteen Million Dollars is Saved to Western Farmers

The closing of navigation, with the consequent longer hauls of western wheat for the railways, will not have any effect in increasing railway earnings, according to opinions expressed at Ottawa. It was pointed out the greater part of the western grain moves during the two months between threshing and the closing of navigation, and that consequently shipments after the close of shipping on the lakes will be somewhat intermittent.

The reduction of the railway rate on grain will save the farmers of the three prairie provinces something like \$15,000,000, it is estimated, and the reduction in freight rates, without any accompanying reduction in operating costs, was bound to have an effect on the railway net earnings.

Where the railways are benevolent, however, as compared with last year, is in the fact the total grain crop to be moved is considerably in excess of that available last year, and this gives them a greatly increased volume of business for the national roads to share in.

Useful in Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

Farm Loans Are Profitable

The annual report of the Manitoba Farm Loans' Association, a Government agency, shows a profit of \$40,553 after repaying to the Provincial Government the grant made for organization purposes. The report covers a period of nine months ending August 31st, 1922. The purpose of the association is to assist in the financing of farm undertakings in connection with which it has at present outstanding advances amounting to \$7,528,639.

Gains 35 Pounds; Rheumatism Is Gone

The wonderful reconstructive powers of Tanlac are again very forcefully demonstrated. In this instance the grateful beneficiary is John H. King, Locksmith, living at 229, 14th Ave., West, Calgary, Alberta, who declares: "Tanlac built me up to good health, with a gain of thirty-five pounds in weight, over a year ago and I have been feeling fine ever since. Just after coming back from overseas, about two years ago, I was taken down with an attack of rheumatism that crippled me up so I couldn't work and sent me to a hospital for about ten months.

"During this long siege of rheumatism I lost fifty-five pounds in weight. I was just a shadow of my old self and had no strength or energy left. I felt tired out and exhausted all the time.

"Finally I resorted to Tanlac and got back on my feet so quick that it surprised me. By the time I finished the fourth bottle I was feeling a hundred per cent. well. I don't believe Tanlac has an equal."

Tanlac is sold by all good druggists.

Peace and Quietness

Tourist.—Is this a quiet place?
Fisherman.—Well, it were stir, until folks began coming here to be quiet.—London Punch.

How to Prevent Biliousness

Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots, long known as *Heber's Seltzer's Curative Syrup*, has no dope or strong ingredients; it chases away indigestion, biliousness and constipation. Can be had at any drug store. Get the genuine. 50c and \$1.00 Bottles."

You can have your

"good propositions," "wonderful opportunities," Turkish and mixed blends," and all the rest

Cottages Built For Luck

In remote parts of England are still to be seen cottages with sloping walls. They were built slightly out of the true because of a curious superstition that if a house was built exactly square it was bound to collapse.

GUARD THE BABY AGAINST COLDS

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Clothes and the Man

The manager of Jack Dempsey is said to own more suits of clothes than any other man in New York. His flat two rooms filled with them. Coincidentally a reporter has found that a man who is the head of a great corporation and has given the world scientific discoveries of value has only two suits of clothes.

Minard's Liniment For Warts, Corns, Etc.

Canadian Winter Climate Big Factor In Producing Best Wheat In The World

With the approach of winter months, once again arises in foreign publications arguments and opinions as to the desirability or disadvantages of Canada's climate.

We who live in Canada are quite satisfied with our winter climate; we know it is both desirable and advantageous, and that without it we could not hope to raise the finest hard wheat in the world and the splendid crop of sturdy, healthy, young men and women. Farmers know that bracing cold weather puts bone and muscle, fat and hide on horses and cattle; lumbermen and trappers that snow solves their transportation problem; while to the lover of outdoor sports, winter time in Canada is a season to be anticipated. Finally, vital statistics bear out the fact that nowhere in the world will a healthier class of children be found than in Canada, and the state of health of the younger generations is the very best indication of the advantages of the climate.

In a very eulogistic article on Canada in the October issue of the International Bulletin published by the International Institute of Economics of New York, one of Canada's great drawbacks is stated to be the climate. "Cosmopolitan," who writes the article, says:

"Canada's chief disadvantages, is that her farther northern climate renders her products less diversified than America's. Finally, vital statistics bear out the fact that nowhere in the world will a healthier class of children be found than in Canada, and the state of health of the younger generations is the very best indication of the advantages of the climate."

On the face of it, this would seem to be a fact, but it would be difficult to convince Stefanoson and other recent northern explorers of this fact. "Forever" as applied to cultivation and living conditions in Canada is a doubtful word, for, as time goes on, conditions in Canada develop and with their northward cultivation and colonization the so-called Arctic climate is being driven farther north. To any who have read Stefanoson's article on climate in the February, 1922, World's Work, "The Living North," the following quotation will be familiar: to those who have not read it, it will be of interest.

Before quoting from that article, however, let us just point out that this question of excessive Arctic climate and unproductive northern areas is fast losing its foundation. Settlement in the Peace River country, in Northern Ontario and to Quebec is going on apace, and areas that, like the northwest, were once considered uninhabitable and uncultivable, are now proving desirable and productive. Back in the early thirties, when grown a thousand miles north of the international boundary took first prize at the Chicago International Exhibition, since then settlement in that area has been steady and expansive. When Canada is possessed of a population of eighteen millions instead of eight as at present, this question of uncultivable northern areas owing to excessive climate, will have faded just in the same way as the question of the fertility and livableness of the northwest faded with time and experimentation. But let Stefanoson speak for himself:

"We have pointed out that the growth of grass and other plants is measured not by the length of the summer in months, but by the number of hours of sunlight, and that there are as many hours of sunlight in three months of Arctic summer as in six months of tropic summer, giving the plants, therefore, in reality, twice as long a growing time as the careless reasoner assumes them to have. This is one of the fundamental considerations which explain the universality and luxuriance of vegetation in the north that is always so startling to the traveler who goes north with a mind furnished with ideas derived from tropical geographicals."

"It seems to be like rather than heat that makes a plant grow fast. But if it were heat, the polar plants would not be badly off. A fairly simple mathematical calculation shows that from the first week of June to the second week of July, the earth at sea level receives from the sun more heat per square mile per day at the North Pole than at the Equator. In mountainous regions, such as Green-

land, there is left over from winter, stored snow to counterbalance locally this tremendous downpour of heat; but on the far more extensive polar lowlands of Siberia, Canada, Alaska, and the Canadian Arctic Islands, there is no stored-up snow to temper the summer heat, which explains the stories told by travellers from these regions of the unbearable swelter of the Arctic summer and explains such weather bureau records as 100 degrees in the shade at Port Yukon, Alaska.

"The speeches in Parliament of Sir Edward Blake and others are more classic in Canada and are there the best known examples of unconscious humor. The English language was used to its capacity in showing the absurdity of the building of the Canadian Pacific Railway. The argument said in substance that the expense of building the road would be so great that, even were we to accept the most optimistic view of what the resources of the prairie provinces might develop into, even so a reasonable freight tariff for carrying them to the Atlantic would never pay for the axle grease of the freight cars. Opponents of the road were willing to concede that if anybody had the incredible folly to squander that much money the road could be built. They admitted further, that it could undoubtedly be operated in summer, but submitted that it was preposterous to suppose that it could be operated in winter, and there followed the self-evident conclusion that the railway could never be profitable, for 'no enterprise can be profitable if it is operated only half the year.' They admitted further, that it could undoubtedly be operated in summer, but submitted that it was preposterous to suppose that it could be operated in winter, and there followed the self-evident conclusion that the railway could never be profitable, for 'no enterprise can be profitable if it is operated only half the year.'"

How Bank Of England Received Nickname

Old Lady of Threadneedle Street Was Real Person

In explanation of the nickname for the Bank of England, a pathetic story is told by Sir William Trevelyan. In the early part of last century there were several people in the city who were famous for their curious attire, and each had his or her nickname. For instance, there were the "Green Man" and the "Lady in Black." There was also the "White Lady of Threadneedle Street," who was a regular visitor to the Bank of England. She was the sister of a poor young clerk who had forged the signature to a transfer warrant. For this crime he was hanged in 1809. "His sister was a needleworker for an army contractor, and lived with an old aunt and her brother in the city. Her mind became affected at her brother's disgraceful death, and every day afterwards she would go to the Bank and walk up to the pay counter. 'Is my brother, Mr. Frederick, here today?' she would ask, and the invariable answer was: 'No, miss, not today.' She never stayed more than five minutes, and invariably her last words were: 'Give my love to him when he returns. I will call tomorrow.' In time the nickname became transferred from the old lady to the Bank itself, and as the Old Lady of Threadneedle Street it has since been known."

Big Game Increasing

Wild Life Of All Kinds In Kootenay National Park

The astonishing manner in which wild animals respond to sanctuary protection is shown by the increase in wild life of all kinds in the Kootenay National Park. Kootenay Park is the new area in British Columbia recently reserved along the route of the new transmontane motor highway from the Vernon-Gamack trail, the Windermere Valley. The district is practically virgin country and was naturally a home for big game, which, since the creation of the park and the establishment of rigid protection, has increased to such numbers that it promises to form one of the greatest attractions to motorists when the road is opened next spring. Wild sheep, goats, black and brown bear, deer, moose and caribou can all be seen by the passing tourist along the road or on the adjacent slopes.

Minnesota produces 40 per cent. of all the iron ore in the United States.

Motor Cars In Dominion

Figures From All Provinces in Canada
Total 463,848

"The average revenue per car for motor licenses in Saskatchewan is the lowest of any province in Canada," said Hon. J. M. Usher, Provincial Secretary, quoting some figures just received from the Federal Department of Highways.

"Statistics compiled by the Federal Department of Highways give the average revenue per car for motor licenses as follows for the nine provinces of the Dominion," he continued. "Saskatchewan, \$13.45; per car; Manitoba, \$15.68; Ontario, \$14.19; Alberta, \$17.83; British Columbia, \$18.27; New Brunswick, \$20.05; Prince Edward Island, \$21.82; Quebec, \$25.37; and Nova Scotia, \$26.07."

"In the total number of automobiles, Ontario is far in the lead with 206,511 automobiles registered, over three times as many automobiles as any of the other provinces, and Saskatchewan comes second, with a slight lead over Quebec, Saskatchewan having 61,175 automobiles registered during the past year and Quebec 45,690. Alberta comes fourth with 40,592, Manitoba fifth with 36,632, British Columbia sixth with 32,850, Nova Scotia seventh with 14,775, New Brunswick eighth with 13,015, and Prince Edward Island ninth with 1,751. There were 81 automobiles registered for the Yukon Territory, making a total for the Dominion of 463,848."

The Gulf Stream

A correspondence which was a surprising story about the influence of the Gulf Stream upon Ireland. He says that there is a stretch of about ten miles at Achill Head, County Mayo, where the stream hits Ireland. This point is actually tropical, and bananas, palms and various flora flourish there as they do in the tropics, while a mile or so either north or south of this point has the cold, damp temperature of the rest of Ireland.

A motion picture film 15 miles in length and which requires nearly 24 hours for continuous exhibition, has been completed in Italy, showing the principal incidents in the Bible from the Creation until the birth of Christ.

Stella Talks About Patterns of Leaves Found on Blocks of Coal.

THE Brownies had been ever so interested when Stella, the Wishing Fairy, had told them about the Moa bird that lived many hundreds of years ago, the remaining bones and eggs of which have been found by the modern people who dig the soil.

"I have a question to ask of something that I am thinking about, Stella, dear," Snookums said, coming close to the Fairy and leaning against her shoulder.

"Well, what are you thinking of?" she gently asked, throwing an arm around her favorite Brownie.

"I was thinking about how all these things happened to be away down in the ground. Had holes been dug and were they buried? But, then, no one would have been apt to bury the Moa's eggs, for instance. I'm afraid I don't understand."

"Do you know what a layer cake looks like?" the Fairy suddenly asked after a long pause.

"The Brownies nodded."

"Then the only way I can possibly answer your question is to give you an idea of what the earth looks like under the surface and to tell you that it rather reminds me of a layer cake, for if you could cut a huge slice slanting through the earth you would see layer after layer of different kinds of soil. You'd see a layer of clay, on top of which is one of sand, then another of rich dark soil, then perhaps one of chalk and so forth."

"Yes, but how did this all happen?" asked Pansie.

"If only we had time today I could explain to you in a more thorough way so that it all would be very clear to you. Of course it is almost impossible to tell you in a few words, but I'll try," said Stella. "First of all, you must realize that it took ages and ages—hundreds upon hundreds of years for each layer to settle. Take, for instance, a layer of 'stratum' of sandy soil. That was made from the massing of stone dust that had worn away and dropped from the parent rocks. Take next a clayey stratum. It may have been formed from the massing of mud from several different sources, all blown together by the winds."

"There are mountains called volcanoes that at various times seem to explode and pour forth burning ashes and molten substances or lava; so there can be no doubt that these also have contributed to the earth's soil, and then again once upon a time immense fields of ice travelled slowly down and not only brought mud and sand but tore their paths through rocks and valleys. This naturally changed the surface of the earth. But just think of the time it took for all these changes to have been made. Just think!"

The Brownies did not know of the time for their answer, for they were, thinking, and thinking hard. And as they thought it made them feel awfully little and lonesome—it gave them a sort of, creepy feeling that is never very pleasant. They all looked quite solemn!

"At certain stages of the earth's life," Stella continued, "immense tracts of plant matter have gathered in swampy places. This slowly has decomposed and settled down until it has become very hard, then it has been covered over by other strata of soil, so that finally—ages and ages afterward—it found itself deep, deep down in the earth, far from the knowledge of what particular thing it was speaking!"

The four Brownies shook their heads.

"The answer," Stella said, "is this. How it first began. People," Stella continued, "have found footprints of huge animals of old that have remained like molds in the ground as it hardened, just as they have found skeletons of huge creatures, just as you have learned about the bones and birds that once roamed around. The Moa, of which I told you last week, was traced in this way, and they have also found distinct patterns of leaves cast on plants that are as plainly made as though they had been carefully traced on black paper, and in this way people have made important discoveries about the plants of the long ago times, about plants that no longer exist."

"Well," she exclaimed, jumping up, "it is late enough for today."

Estimate Heavy Increase In Value Of Field Crops Over The Preceding Year

Canadian Soldiers Remembered

Wreath Placed at Foot of Cenotaph in London

Canadian soldiers who fell in the great war were remembered during the Armistice Day observance ceremonies in London, when Field Marshal Earl Haig, acting on behalf of the Great War Veterans' Association of Canada, placed a wreath at the foot of the cenotaph in Whitehall, according to a cablegram from Earl Haig received at the Dominion Command Office of the Association.

Earl Haig in his capacity as president of the British Empire Service League, placed wreaths on behalf of Australia, New Zealand, India and soldiers from the other British dominions. The G.W.V.A. is one of the associations composing the British Empire Service League.

Patience In Fruit Culture

Time Required to Popularize a New Variety of Apple

The Dominion Horticulturist gives the following as the stages regarding time through which a new variety of apple must pass from the sowing of the seed until it becomes a popular sort. From sowing seed to planting trees in fruiting row, 3 years; from planting to bearing 5 years; from bearing to confirming characteristics of fruit, 5 years; from propagation to planting in orchard, 5 years; from planting propagated trees in orchard to fruiting of the same, 6 years; if approved by nurseryman, time for nurseryman to build up a stock for sale, 3 years; from time of sale until trees are in full bearing in fruit orchard, 10 years; to popularize fruit after it is available, 5 years. This makes a period of forty years in all which surely indicates the work and patience that are required for the marketable production of a good apple.

Canada's field crops for 1922 are estimated by the Financial Post to be worth approximately \$11,810,275.55, as against \$968,381,870 in the preceding year, an increase of about \$10,841,895.00.

There was a substantial lowering of prices during the period under review, and a corresponding reduction in the scale of wages, with the result that farming conditions were in a more or less unsettled state. With lower costs of planting, threshing and marketing the margin of profit on the wheat crop should be better than last year. Owing to the phenomenal yield of nearly all agricultural products this year, few decreases in value as compared with the previous twelve months are recorded. Increases are shown in wheat, oats, barley, rye, flax, buckwheat, mixed grains, and turnips, while peas, beans, corn (both husking and fodder), potatoes, hay and clover, alfalfa and sugar beets, register decreases.

The same authority roughly estimates the value of products of the ground, the sea and the forest, including highly manufactured products or wealth from water-power developed, as slightly over \$2,500,000,000, or based on a population of eight and three-quarters of a million, a per capita value of about \$320.00. Agricultural products, of course, account for the largest share of the total, amounting to \$1,119,275,555. Livestock comes next with a value of \$746,720,000, followed by \$1,000,000,000 of importance by paper and pulp worth \$244,562,000, lumber \$128,311,427, minerals \$117,325,437, fur \$110,207,534, fisheries \$34,930,935, furs \$10,122,571, and \$2,565,900, and tobacco \$2,400,000. These figures are based on the 1922 Winnipeg average cost price basis.

The large grain crop in the prairie provinces will enable the farmer to get back on his feet again, make needed improvements on his farm, and leave him an advantageous position to start the new year. Many companies, owing to the tightness of money and the depressed condition of the home market early in the year, have been holding up development plans, but with the commencement of the movement of the wheat crop, money has become easier and a number of manufacturers have announced they will go ahead with their original plans. Mining and pulp mill paper industries are unusually active, and reports from all sources indicate that the coming year will see an active period of expansion.

Prince Satisfied With Ranch

Says He Has Received Good Reports From Alberta

The Prince of Wales, speaking at a luncheon at the Canadian Club in London, which was presided over by Hon. F. C. Larkin, Canadian High Commissioner, on November 10, three years ago, that he left Ottawa to embark for home at the end of a tour of the Dominion. The present occasion recalled his wonderful experiences in Canada and increased his hope that he would one day return to his many friends there.

November 11 was another anniversary, the greatest of all that he had observed throughout the Empire. He always would be proud of the fact that he had served with the Canadian Corps on Armistice Day. The Prince said that his small farm in Alberta was a great link between him and Canada and constituted an assurance that he would one day return to "that country." He could not claim that he was making in dollars, but quite recently he had received satisfactory reports from the ranch. Breeding societies all over the Empire had offered to supply animals, but while he was grateful, he was compelled to decline them, or his outfit in Alberta would soon be like a menagerie.

Alberta Leads In Coal Production

For the past two years, says a return issued by the Bureau of Statistics, the province of Alberta has held the premier position among the coal producing provinces of Canada, with Nova Scotia, the former leader, a close second, and British Columbia third, with Saskatchewan and New Brunswick following in order.

"Oh," ejaculated Miss Marshall, with a world of meaning in her tone, "I thought you were old friends."

"That estimable young woman needs watching," Mary warned me that night after we had gone to bed. "If I know anything, she has her eye on my Uncle Don. Don't let her get him, Elinor! If you don't want him, I do; it would be a pity to let such an interesting specimen out of the connection."

I pretended that I was asleep, and Mary—doubtless suspecting the presence—smothered what I thought was an unnecessary laugh in the pillow. I have ceased to pay any attention to Mary's teasing—why, she teases even Mr. Bingham, and if that does not prove her inexcusable, I have nothing further to say.

For two weeks before Christmas Mrs. Bingham had taken charge of all parcels that came, and would allow none of them to be opened; so on the eventual morning the Christmas-tree was covered with bundles of all sizes and shapes, and several big ones had to be piled on the floor. I think I was almost as much excited as Sunny, but not quite so noisy, I hope. Every one remembered me, and a list of my gifts would read like a bazaar prospectus. "Jerry" Brown sent me a rug about six feet square, made of beautiful silky badger skins. I suppose I should return it, but I hate to hurt his feelings—and then the rug is so lovely.

"I'd like you to keep it for your self," ran the note which accompanied it; "the badgers were all shot on my own place. But if you don't want to keep it, I mean you'd better send it home to your father. I notice that Old Country folks generally like such things. Don't forget to thank the poor badgers, a lot more good horses won't get their legs broke with them out of the way."

No one here, except Mary, knows who sent the rug, and I have the pleasure of seeing them all consumed with curiosity.

I do not know what time Sunny woke on Christmas morning, but I know that she woke me before seven by pounding on the door and shouting, "Please let me in, Auntie Elinor. I have something for you from Uncle Don."

To calm the tumult I jumped out of

ARE YOU A MOTHER?

Mrs. Dalton tells of a Well-known Doctor's Prescription that is safe for Young Mothers. It acts as a Tonic and Nervine because it contains no harmful ingredients.

London, Ont.—"Dr. Pierce's Favorite Prescription saved my life years ago and for that reason I am most enthusiastic in my recommendation of it to women who are ailing and weak. I was taken with the measles when in an expectant condition; then blood poisoning set in and my family became greatly alarmed. The doctor advised me to give me Dr. Pierce's Favorite Prescription and I took several bottles of it and was restored to absolutely perfect health. I later took Favorite Prescription as a tonic and nervine and received great benefit from it. As a woman's medicine it is unequalled."—Mrs. Jennie Dalton, 567 York St.

HEALTH BRINGS BEAUTY

Your Health is Vital to You

Barrie, Ont.—"I was suffering from a run-down system some time ago, was unfit to perform my daily duties, and was advised to try Dr. Pierce's Favorite Prescription. I took two bottles, and was restored to my natural strength. I cannot praise Dr. Pierce's medicine too highly and will be willing to write to any one sending stamped envelope."—Mrs. A. H. Bingham, R. No. 1.

You'll soon feel better if you obtain this "Prescription" of Dr. Pierce's at your nearest drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. tablets and write for free medical advice.

W. N. D. 3447

bed, lighted the gas, and opened the door. Sunny was in her dressing-gown and slippers, and she carried a long box which she handed to me with an impressive bow.

"Look here, Sunny," said Mary, who of course had been awakened by the noise, "Uncle Don must have meant you to give that to me."

"No, he didn't," said the messenger decidedly; "he said give it to Auntie Elinor with his love, and not to wake Mary. I guess he thought you would be tired."

"Very considerate of him, I'm sure," drawled Mary mockingly. "Elinor dear, I think you had better lie down again; you look rather feverish."

"Not scared, feverish?" queried Sunny anxiously.

"Perhaps it's only the reflection of that pink lamp-shade," Mary answered, after a moment of consideration, and Sunny looked happy again.

I wish I could cure myself of that foolish habit of blushing!

"Hurry up and open your box," commanded Sunny. "and then you and Mary get dressed and come down to breakfast. I just feel as if I couldn't wait a minute longer to see what Santa Claus brought me, and Mother says that I must wait until everybody else is ready before I touch one thing."

I opened the box, and found—an immense bunch of big, velvety La France roses! To appreciate my feelings

most remember that the nearest florist's shop is hundreds of miles away. Mary looked a whole circulating library, but said nothing. She is calling me now to go downstairs and play with her. I think it best to do so, as she threatens to confiscate and read my diary if I do not go at once.

XXV.

Bar B Ranch.

February 5th, 19—

The first month of the New Year has passed uneventfully. Almost before I know it I shall have come to the end of my year in Canada.

Mary left us last week, and all the flags are flying at half-mast—to speak figuratively—

DIAGNOSTIC! That is to remind Elinor Elliot, aged seventy-eight, to skip a few pages just here. It is well for me to forget the follies of youth.

I know quite well that I should not be jealous of Mary, but I am, and I was never really jealous of anyone before. It is not a comfortable sensation. I can assure you I am very fond of Mary, and I hope we shall always be good friends, but I must confess it troubles me to hear her praised and sung from morning until night. Isn't that a despicable frame of mind to be in?

Of course there is a man at the bottom of it—who was the idiot who first said that a woman was at the bottom of all the trouble in the world, I wonder? He simply did not know what he was talking about. For my part, I think this would be a perfectly lovely world if there were no men in it.

Mr. Livingstone and I were the best of friends before Mary came, but of late he has changed towards me. I do not like to be hard on another girl, but I do think that Mary flirted with him a little brazenly. And I could do nothing but ignore the change in his attitude, and at the same time reproach myself for being so credulous as to believe that real friendship was possible between a man and a woman. It is quite evident now that Mr. Livingstone was so very good to me simply because I was the only girl at hand I suppose he would have flirted with me if I had given him any encouragement. I hope he does not know that he is hurting me; I would rather die than let him see just how much I feel the loss of his old brotherly manner.

I have once thought to thank Mary for, although I was angry when first I heard about it. While told Mr. Livingstone about Arthur. How much she told I cannot say, nor do I care now. He (Mr. Livingstone) is evidently of the opinion that we are as good as engaged, and I shall let him continue to think so. It is one way of saving my pride, and I intend to save my pride even at the expense of my boasted modesty. And poor Arthur has nothing to lose by the deception—Mother tells me that he is openly transferring his affections to Helen! "The very best thing that could happen," says Mother in her last letter, and I have not the heart to laugh; "his prospects are good, and he will make a more suitable husband for Helen than for Helen! Helen is just what I was a hand, but you are different. Your husband will have to be your master, and Arthur is too much of a Christian gentleman to even wish to be any woman's master." It looks as if Mother is beginning to understand her own lack of chicken at last. It is possible that under her mid-Victorian veneer, she also has the common sense of a slightly modernized caveman. I hope Helen will not fall in love with Arthur, who, with my help, is to have something better than my cast-offs; but perhaps Helen is not jealous!

Mr. Livingstone drove Mary in to Carleton Place and saw her started on her journey home. I had taken it for granted that I should go too, but when the time came they let me see very plainly that they were not wanted. They said that it was because the day was stormy and I might catch cold, so of course I had to submit gracefully. But I know quite well that they don't want me. I suppose it is perfectly natural for people in that condition to wish to be alone to say good-bye. I am horrid, I know.

I feel utterly wretched, and the thing that hurts me most is the know-

ledge that there is a cloud between Mary and me. (Perhaps that is not quite honest, but I shall let it stand.) When she kissed me good-bye she was very much affected, and so was I, but her last words braced me up as nothing else could have done. "You will forgive me some time, Elinor," she whispered, and then tore herself away before I could reply. Have I made it so plain to her that Mr. Livingstone's desertion has hurt me? She might at least have had the grace to refrain from speaking of it. I hate to feel so towards her—and I think that I had never seen Don Livingstone.

I had a letter from her to-day, just a few lines written on the main table pointed when she reached Winnipeg. I do not know how to answer it in my usual way, but I must try to do so. If I can help it, no man living shall come between Mary and me.

I have not had a letter from home for two weeks, but I hope to get two this evening. Mr. Paget called yesterday on his way to Carleton City, and he will come back this way to-night if there is any mail for us. "It is no trouble at all," he assured me when I thanked him; "we Britishers must stand by each other, you know. And we all feel jolly blue when we think the people at home have forgotten us." Every one in a while Mr. Paget does or says some awful little things that makes me regret the many times I have made fun of him. And then, as he says, we Britishers must stand by each other.

(To be continued)

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage habitual operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Many a man who hangs you good advice does not know if good or he would have kept it himself.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Extirminator.

Turks Profess To Be Working Hard In The Interests Of Peace

Paris.—Ismet Pasha, in his military capacity of a Turkish General, is a visitor in Paris.

Ismet declared to the Associated Press that he considered there was no likelihood of trouble at Constantinople.

"What we are working for as hard as possible is peace," he said. "It is for our interest to have peace."

Premier Poincaré, without replying in detail to Lord Curzon's memorandum, has sent word to London that he sees nothing in it to prevent France and England from reaching an accord on the attitude their delegates should take at Lausanne.

Lord Curzon, therefore, is expected to come to Paris for a talk with the Premier; then both will go to Lausanne and discuss conference matters with the Italian representative.

The two statesmen still will have to decide whether France and Great Britain, should, if necessary, make an effort to force and impose the execution of treaties as to the Straits. The British contend they should be occupied for several years, both on

HEART PALPITATED And Was Short Of Breath

Through one cause or another a large majority of people are troubled, more or less, with some form of heart trouble.

Many people may be unaware of having anything wrong with their heart till some little excitement, overwork or worry starts it to palpitate and throb, skip, beat, beat fast for a time and then to slow as to seem almost to stop, then it causes great anxiety and alarm.

To all such sufferers

MILBURN'S HEART AND NERVE PILLS

will give prompt and permanent relief. Mrs. Alice Bishop, 15 Hawthorne Ave., Hamilton, Ont., writes: "I take pleasure in recommending Milburn's Heart and Nerve Pills to all persons troubled as I had been."

I suffered from palpitation of the heart and shortness of breath; my heart would skip beats and in the night, at times, I would have to sit up to get my breath. I could not go up stairs without my heart fluttering and my nerves were all unstrung, but since using your famous Pills I have felt like a different person."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto Ont.

Loss Due to Strikes

Ottawa.—An estimated loss of 54,502 working days due to strikes during October, 1922, according to figures issued by the Department of Labor. During the month there were 17 strikes, involving 3,229 working people, as compared with 18 strikes, 15,275 work people and \$1,900 days' loss in September, and 17 strikes, 1,897 work people, and 46,026 days, lost in October, 1921.

Sims Visits Native Towns

Port Hope, Ont.—Wm. S. Sims, retired Rear-Admiral of the United States navy, was acclaimed here as a famous son of Port Hope. The Admiral was born in this town 64 years ago and left it when 10 years old. His visit here was the first time he has set foot in Port Hope in 54 years. The noted Admiral was received by the civic dignitaries and prominent citizens here.

Slight Reduction Shown

Ottawa.—A slight reduction in the cost of the family food budget during October as compared with the previous month is reported by the Labor Department. "The changes, however, were chiefly seasonal."

Sailors Are Sentenced

Sydney, Australia.—Twenty-three members of the crew of the steamer Moeraki have been sentenced to ten weeks hard labor for refusing to perform their duties.

Look to Your Eyes

Beautiful Eyes, like fine teeth, are the result of constant care. The daily use of Murine makes eyes clear and radiant. Murine is the only eye medicine recommended by all druggists.

CREEPS INTO THE SYSTEM JUST LIKE A SERPENT

Like a thief in the night, it steals through the system—that's how Catarrh acts. Don't trifle with such a scourge. Time and experience have proved that Catarrhoxone is a wonderful remedy for all Catarrhal and bronchial trouble. You don't take any drugs, you just inhale the sweet soothing vapor of Catarrhoxone which is laden with balsamic essences that heal, relieve and ease the sufferer. To strengthen the throat, to sweeten the breath, to stop nasty discharges, to drive out Catarrh, colds and weakness in the throat, use Catarrhoxone. Two months treatment one dollar, smaller size 50c, all dealers or the Catarrhoxone Co., Montreal.

account of the unstable situation in Russia and as a guarantee for the execution of the treaty in the same way that Rhinecland is occupied.

The British note asks for the complete demilitarization of the zone under control. It also expresses the opinion that effectiveness of the Turkish army should be limited, particularly in Europe. It favors the maintenance of the Ottoman debt and the amalgamation of the railroads, the Allies being represented on the management.

Calgary Receives Large Shipments Of Wheat

Over One Million Bushels Have Been Inspected

Calgary.—One thousand and twenty-nine cars of wheat have been inspected in Calgary since November 1, according to figures compiled by George Hill, Dominion grain inspector. At an average of 1,200 bushels to a car, this makes 1,337,000 bushels of wheat.

According to local grain men, the wheat shipments into Calgary have passed the peak, although many cars are coming into the city daily.

Record Lumber Shipment From B. C.

Montreal.—Loaded down with five million feet of lumber, to be used for the extension of wharves in the eastern section of the port of Montreal, the steamer Margaret Coughlan arrived here from Vancouver with the largest cargo of its kind that ever entered the harbor.

SPOHN MEDICAL CO. GOSHEN IND. U.S.A.

British Electors Give Substantial Majority To Hon. A. Bonar Law

Strained Muscles, Sprains, Can Be Treated Quickly

In minor sprains, the muscle is strained a little, and all that is needed is a vigorous rubbing with Nerviline. This draws the extra blood away, and permits the muscle to return to its normal condition. The supremacy Nerviline enjoys is owing deeply to its penetrating power. It strikes deep, that is why it removes deep-seated pains, and fixes up folks that have Rheumatism, Lumbago, Neuralgia and Sciatica. There is about five times the pain destroying power in Nerviline than you find in the average liniment. Sold everywhere, 50c per bottle.

London.—The election returns indicate that the Conservative ministry formed three weeks ago by Right Hon. Andrew Bonar Law is returned with a substantial majority over all other groups. Features of the returns are the gains scored by Labor and the poor showing made by the Independent Liberals under the banner of the former premier, H. H. Asquith. Mr. Asquith was returned in Paisley with a much-reduced majority, and many of his lieutenants fell by the wayside.

The Lloyd Georgians showing is not regarded as a feather in the cap of the former premier. Lloyd George himself is in by acclamation, and two of his former ministers are also returned.

Two members of the Government were defeated, Col. Leslie Wilson, chief Conservative whip, and Col. Stanley, Under-Secretary for Home Affairs.

One surprise was the election of a Liberal for Oxford, where in both town and university the Liberals have been in the wilderness for many years.

Lady Astor comes back to the House from Plymouth, despite the strong campaign made against her because of her attack on the liquor interests. She had practically the same support she commanded in the first election.

It pays to patronize home industry. Buy from the merchants in your own town.

Pilotless Plane a Success

Washington.—The pilotless army airplane, equipped with an automatic control device, said to be more accurate and dependable than any human pilot, had been developed to a point where it has made successful flights of more than 90 miles. It was announced by the United States army air service.

Dye Skirt, Coat, Draperies With Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint, faded, shabby skirt, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

Will Apply For Road Grant

Several Places of Alberta Highway in Qualifying Class

Edmonton.—Notice has been given by the Public Works Department of the Provincial Government to the Federal authorities at Ottawa that it is the intention to apply for a grant next year, the last in which the latter will be in effect, and some of the Alberta roads will be entered for their share of the Dominion grant. Several pieces of highway construction done during the past season are said to be in the qualifying class for this assistance.

The Old Favorite Is Just As Popular As Ever

And Just as Effective in Relieving Coughs, Colds, Croup and Bronchitis

For over a quarter of a century Dr. Chase's Syrup of Linseed and Turpentine has been the favorite treatment for coughs and colds.

It is still growing in favor, for the simple reason that it can be depended on as a positive relief for Croup, Bronchitis, Whooping Cough and Asthma.

Bronchitis

Mr. J. Pearson, 207 Oak St., Toronto, Ont., writes:—"I was troubled with bronchitis and had a very bad cough. I had the cough so long I was becoming afraid of other developments. I tried all kinds of cough remedies without relief. I saw Dr. Chase's Syrup of Linseed and Turpentine advertised and tried a bottle. I was greatly surprised at the relief I got from the Linseed and Turpentine. I bought five more bottles and was completely relieved."

Severe Cold

Mr. Lloyd Ballen, Sunnybrook Farm, Pownall, Lot 49, P.E.I., writes:—"After I got over the 'flu' last winter, I took a very severe cold. I tried several kinds of cough medicines, but none of them gave me relief and I began to fear it would turn to something more serious. One day, however, I picked up a copy of Dr. Chase's Almanac and saw your Syrup of Linseed and Turpentine advertised. I got one bottle immediately, which completely relieved me."

No. 20471—ARC.
JUDICIAL SALE OF FARM PRO-
PERTY NEAR STONY PLAIN,
ALBERTA.

PURSUANT to the Judgment and
final Order for Sale, with the appro-
bation of the Master of the Supreme
Court of Alberta, Judicial District
of Edmonton, the following parcels
for sale by Moody W. H. Munn, Auc-
tioneer, at the Post Office in the
Town of Stony Plain, Province of
Alberta, on SATURDAY, the 2nd
day of DECEMBER, A.D. 1922, at
the hour of 2 o'clock in the afternoon,
the following lands, namely:

The South-East Quarter of Section
Twenty (20) in Township Five-two
(52) Range One (1) West of the Fifth
Meridian containing One Hundred
and Sixty (160) acres, more or less,
reserving thereon mines and minerals
and subject to the reservations
contained in the original grant from
the Crown, and in the existing Cer-
tificate of Title for the said land.

THE VENDORS are informed that
there are 160 acres of land, 80 acres
of which are good arable land, 10
acres of low land well suited for hay
or pasture, 40 acres of scrub land and
20 acres of slough. The property is
fenced on two sides with a three-
strand wire fence. The well is sandy
loam with clay subsoil averaging 8
inches in depth. The property is
watered by a lake. The nearest rail-
way station to the said property is
Stony Plain a distance of six miles.
The property is situated one and a
half miles from a church and one
and a half miles from a school and
is in a settlement of German speaking
people.

THE SALE is subject to a reserved
bid which has been fixed by the
Master.

TERMS OF SALE: Ten per cent
of the purchase price to be paid at
the time of the sale, and the remain-
der of the purchase money is to be
paid into Court within sixty days
without interest, or, in the alterna-
tive, a deposit of ten per cent, as
aforesaid, and a mortgage may be
granted for \$800.00, payable \$100.00
each year for four years and the
balance at the end of the fifth year
with interest at eight per cent per
annum, and the balance of the pur-
chase price to be paid into Court
within sixty days without interest,
and upon payment of the said bal-
ance (or upon the execution by the
purchaser of the mortgage and pay-
ment of the balance as aforesaid) the
purchaser shall be entitled to a vest-
ing order and to be let into posses-
sion.

IN OTHER RESPECTS the terms
and conditions of sale will be the
standing conditions of sale of the
Supreme Court as approved by the
Master in Chambers.

For further particulars apply to
MESSRS. GIESBACH, O'CONNOR
& COMPANY, Barristers, 1002 Jasper
Avenue, Edmonton, Alberta.

Dated at Edmonton, in the Prov-
ince of Alberta, this 17th day of Oc-
tober, A. D. 1922.

"R. P. WALLACE"
Clerk of the Supreme Court.

APPROVED:
"A. Y. B."

The pupils at the local
school are beginning to pre-
pare already for the Xmas
entertainment, which will be
held early this year.

Hauling grain to market
has been the fashionable out-
door pastime the past week
or two.

The Big Game hunters re-
port a good season, so far;
the fellers that ain't getting
moose is getting coyotes. One
hunter reports being away
three days—two of the days
he was tracking a barcoufied
cayuse in mistake for a bull
moose, and used up large
chunks of language when he
found out his mistake.

The big game hunters have
another story about the sad
case of a young man who lost
his dear at a recent dance,
and was inconsolable for a
time. She wasn't really lost,
however, as another feller
had got her.

Much speculation has been
caused lately concerning the
antics of a gent who has been
riding around the district.
His riding around wasn't
annoying anyone much till
they noticed he was always
turned around in the saddle
—back to the front. Some
say he seems to be looking
for something; while others
say he's a Scotsman.

Spruce Grove News.

R. Secord Jr. of Spruce
Grove, has secured four splen-
did Holsteins for his herd
from Campbell & Griffin, Cal-
gary. The cow for which he
paid \$500 was first in the
milking contest at the Cal-
gary Fair in 1921, and is a
splendid animal with a won-
derful record behind her.

Three other heifers of test-
ed merit were bought from
J. Mitchell, for \$200.00 each.
These were some of the finest
in Mr Mitchell's herd, which
is so well known for its high-
class animals.

Mr Secord is to be con-
gratulated on his enterprise
and foresightedness at a time
when the majority of stock-
raisers in the Province are
so discouraged over the tem-
porary depression in their line
of business.

Spicy If Not Caustic.

Man (in drug store).—I want
some consecrated lye.

Druggist.—You mean concentra-
ted lye.

Man.—It does nothing any dif-
ference. That's what I camphor.
What's it sulphur?

Druggist.—Fifteen cents. I
never cinnamon with so much
vit.

Man.—Well, I should myrrh
myrrh! Yet I ammonia novice
at it.

—Mutual Magazine.

6° Frost Period.

To give Alberta people an
idea of the periods which are
free from dangerous frosts,
the Publicity and Statistical
branch of the Department of
Agriculture has compiled from
the Dominion meteorological
records a table showing the
"Six Degree Period," taking
into consideration the date of
the last six degree frost in
the spring and the first six
degree frost in the fall, and
covering dates from the for-
mation of the province to
the end of 1921. The figures
quoted hereunder cover the
period from 1916 to 1921—
six years—and farmers who
are interested in a subject of
this kind should cut out these
figures and put them away
for reference.

Medicine Hat—Average over six
years 173 days; longest period 200
days in 1921; shortest period 154
days in 1916; April 9, 1919, and
October 22, 1918, are extreme
dates.

Calgary—Average over six years
151 days; longest period 166 days
in 1917; shortest 136 days in 1921;
May 4, 1919 and October 22, 1918,
are extreme dates.

Edmonton—Average over six
years 147 days; longest period 164
days in 1921; shortest 119 days
in 1917; April 24, 1918 and
October 8, 1918, are extreme dates.

Vermilion—Six years average
123 days; longest period 136 days
in 1918; shortest period 110 days
in 1920; May 17, 1918, and Sep-
tember 30, 1921 are extreme dates.

Peace River—Six years average

119 days; longest period 153 days
in 1921; shortest period 115 days
in 1916; April 7, 1921, and Sep-
tember 30, 1917 are the extreme
dates.

In a series of experiments made
at the Laconie Experimental
Farm to determine the time re-
quired to mature various grains,
it was shown that in 1916 it re-
quired 153 days to mature Marquis
wheat, 155 days to mature Banner
Oats, and 140 days to mature
O. A. C. barley, calculating the
time from the date of seeding to
the date of harvesting. In 1917
Marquis wheat required 119 days,
Banner Oats and O. A. C. barley
98 days. In 1918 Marquis wheat
required 136 days, Banner oats
120 days, and O. A. C. barley 128
days. In 1919 Marquis wheat re-
quired 129 days, Banner oats 120
days, and O. A. C. barley 113 days.

From these figures it would ap-
pear that climatic conditions have
a great deal to do with crop pro-
duction in Alberta.

SPECIAL CLUBBING OFFER.

**YOU GET
THE AMOUNT OF THAT CHEQUE**

We have made arrangements with the R. H. Heath Co. Limited who
publish the CANADIAN POWER FARMER whereby we are able to
offer that farm magazine together with our own weekly at the one
price for both papers.

The CANADIAN POWER FARMER is West-
ern Canada's biggest farm monthly. It is now
in its twentieth year which means that it is
thoroughly established throughout the West.
It deals with the mechanical side of the farm.
Every issue is full of helpful hints and ex-
periences on the operation of all kinds of farm
machinery from a washing-machine to a tractor.
The editorial staff consists of men thor-
oughly familiar with every branch of farming
both from the practical and theoretical stand-
point. Every month the magazine publishes
expert advice as to be readers. Many of these
are short cut findings that are real money
savers to farmers.

This offer may be withdrawn at any time.
Without doubt, your attention is to renew for
this weekly, then why not take advantage now.
Your subscription to this weekly together with
a year's subscription to the CANADIAN
POWER FARMER for the same price as this
weekly alone. This is where you get the \$1.50.
Mail your cheque or drop into our office this first
time you are in town.

DAUGHTER HAD TO HELP MOTHER

Now Can Do All Her Housework Alone Because Lydia E. Pinkham's Vegetable Compound Helped Her

Jasper, Minn.—"I saw in the paper about Lydia E. Pinkham's Vegetable Compound and took it because I was having such pains in my stomach and through my back that I could not do my work. I had tried other medicines, but none did me the good that your Vegetable Compound did. Now I am able to do all my work alone while before I had my daughter staying at home to do it. I have told a number of friends what it has done for me and give you permission to use my letter as a testimonial."—Mrs. JESSE PETERSEN, Route 1, Jasper, Minn.

There is no better reason for your trying Lydia E. Pinkham's Vegetable Compound than this—it has helped other women. So if you suffer from displacements, irregularities, backache, nervousness or are passing through the Change of Life remember this splendid medicine. What it did for Mrs. Petersen it may do for you.

The Vegetable Compound stands upon a foundation of nearly fifty years of service.

Help You Run the Ball

—bring home the bacon, collar the blue vase, carry the message to Garcia, etc.

LITTLE Raisins, full of energy and iron, will put the pep into you that makes winning plays. Use vin like it in your business, too.

One hundred and forty-five calories of energizing nutriment in every little five-cent red box that you see.

Comes from fruit sugar in practically predigested form—leaves the scientists call it—so it goes to work almost immediately. Rich in food iron also.

Try these little raisins when you're hungry, lazy, tired or faint. See how they pick you up and set you on your toes.

WORLD HAPPENINGS BRIEFLY TOLD

A commercial treaty between France and Italy has been signed at the Foreign Office.

The Swiss Government has decided to establish a grain bureau for the importation of cereals from America and elsewhere.

Southampton's new floating dock, which is being built to take the big Atlantic liner, is to be finished within 10 months.

The President of China and the Premier of New Zealand were elected Honorary Presidents of the Pan-Pacific Union at the dinner at Honolulu. The Pan-Pacific Commercial Congress was in session there.

Saskatchewan automobile license fees for 1928 will be figured on a wheel base system, with a minimum of \$15 for cars of not more than 100 inches. It was announced by Hon. J. M. Ulrich, Provincial Secretary.

The Duke of Devonshire, speaking at Dundee, declared that Canada was reaping the fruits of British brains, capital and labor. He predicted that the British overseas territories would be greatly developed in the next few years.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

The man who thinks his business can't get along without him soon begins to share the profits with a new specialist.

Minard's Liniment For Garget in Cows

A giant fish, measuring 75 feet in length and weighing 15 tons, nearly the equal of five full-grown elephants, was recently washed ashore at Cape May.

Would Need Shock Absorber

Jones was buying a cheap car, and was discussing the necessary fittings. "How about a shock absorber?" he asked. "Well," said the salesman, "we can fit one for you?" "No!" replied Jones thoughtfully. "No, don't fit it on; just send one to my wife in advance—she thinks I'm buying a limousine!"

RICH, RED BLOOD NECESSARY TO HEALTH

Weak, Watery Blood Needs a Tonic to Build It New

Why are we continually told that health-giving blood must be bright red? What has color to do with the quality? Just this—the oxygen in the air is the great supporter of all organic life. One function of the blood is to take the oxygen from the air, which it meets in the lungs and delivers to the tissues of the body. When the blood, filled with life-sustaining oxygen, is sent out by the heart, it is bright red. When it returns, impure and deprived of oxygen, it is dark.

You will see, therefore, that there are two prime requisites of health, pure air and bright red blood—the pure air to furnish the oxygen, the rich red blood to carry it where it is needed.

Pale, anemic people, whose nerves are on edge, who tire out easily, and who suffer from frequent headaches, do so because their blood is thin and watery. All such people can improve their condition through a fair use of Dr. Williams' Pink Pills, which enrich the blood, thus enabling it to carry oxygen to the system. Among those who have benefited from the use of this medicine is Mr. Charles A. Stayer, Glenhouse, N.S., who says:

"Some four years ago I found myself badly run down, I tired very easily, and found it difficult to do my work. My appetite failed and I slept badly at night. I was taking medicine, but it was not helping me, and I was growing weaker and weaker. A friend who called to see me advised me to try Dr. Williams' Pink Pills. I got six boxes and before these were done I felt better. Then I got six more boxes, and after taking them felt as well and strong as ever. Four years have passed since that time, and I have continued in good health and working all the time. I have recommended these pills to others and shall continue to do so."

These pills are sold by all medicine dealers or will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

Wainwright Buffalo for England

A pair of buffalo recently donated by the Canadian Government to the Zoological Gardens at London, England, recently left Wainwright Park. They were shipped in crates to Montreal and will be landed on board ship in specially constructed pens, 10 feet by 12 feet.

Candella wax obtained from a Mexican weed is the main ingredient in shoe polishes used on brown and tan shoes.

RUPTURE KILLS 8,000 ANNUALLY

Eight thousand persons each year are laid away—their death certificate being marked "Rupture." Why? Because the unfortunate ones have been taking care of the skin (swelling of the veins) without paying attention to the cause. What are you doing? Are you neglecting yourself by wearing a tight, appliance or underwear that puts a strain on the abdomen? The strain is only a mechanical one and cannot be expected to act as more than a mere mechanical support. The binding pressure retards blood circulation, thus robbing the veins of the fluid that which they need most—nutrition.

But science has found a way, and all true sufferers in the land are invited to make a test right in the privacy of their own homes. The PLEASO method is unquestionably the most scientific, logical and successful self-treatment for rupture the world has ever known.

The PLEASO PAD, when adhered closely to the body cannot possibly slip or shift out of place, therefore cannot chafe or irritate. As soft as velvet—easy to apply—comparatively inexpensive. To be used whilst you work and whilst you sleep. No strapping, bandages, springs attached.

Learn how to close the hernial opening as nature intended so the rupture CAN'T come down. Send your name and 5c coin or stamp, today to PLEASO CO., 482 Stuart Street, St. Louis, Mo., for trial PLEASO and instructive information. (C) P.L.

A Martyr to Science

Doctor Lost Both Hands Through Experiments With X-Ray

Dr. John Spence (50), Edinburgh, as a result of X-ray experiments, sustained serious damage to both hands, necessitating amputation of the right forearm. Dr. Spence was among the first in Scotland to take up research work of X-ray and medical electricity. Although he well knew the risk he ran, and while still suffering from dermatitis, Dr. Spence continued his valuable and heroic work for the benefit of suffering humanity. He is still carrying on his work as radiologist at Leith Hospital, and Craigleith Hospital, Edinburgh. The trustees have awarded Dr. Spence a medal and an annuity of £120.

On the Marriage Day

Romance usually ceases, and history begins, and sore cares begin to go when "Putnam's" is applied. It takes out corns, roots, branches, stems—no trace of a single corn left after Putnam's Painless Corn Extractor has done its work, 25c at all dealers. Refuse a substitute.

Saskatchewan Grain Shipments

Over Sixty-Five Million Bushels of Grain Shipped Up to Oct. 14th

Out of a total of 44,817 cars loaded at country elevators on the Canadian Pacific Railway lines in the three prairie provinces between September 1st and October 14th, 25,500 cars were loaded at Saskatchewan points. The total quantity of grain shipped on C.P.R. lines to October 14th was 65,219,498 bushels, or an average of 1,455 bushels per car, or a total of 27,102,500 bushels of grain handled in Saskatchewan alone this season.

"Cascarets" 10c

For Sluggish Liver or Constipated Bowels

Clean your bowels! Feel fine! When you feel sick, dizzy, upset, when your head aches, or when your stomach is sour or gassy, just take one or two Cascarets to relieve constipation. They are a gripping—sluggish—laxative-cathartic on earth for grown-ups and children. 10c a box. Taste like candy.

The scientific study of electricity began in the sixteenth century, when certain experiments were shown to Queen Elizabeth.

Minard's Liniment Co., Ltd., Halifax, N.S.

Minard's Liniment Co., Ltd., Halifax, N.S.

Minard's Liniment Co., Ltd., Halifax, N.S.

Nation-wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, larynx and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

In Palmyra, Syria, there is a lying physician who locates and visits his patients among the wandering Bedouin tribes by means of an airplane.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of mucus or catarrh of the throat, nose, or eyes. We do not recommend it for any other disease.

HALL'S CATARRH MEDICINE is a fluid, taken internally, and acts through the blood upon the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

He—Do you enjoy novel reading, Miss Freeman?

She—Oh, very much. One can associate with people in fiction that one wouldn't dare to speak to in real life.—Boston Transcript.

Minard's Liniment For Colds, Etc.

OIL LIGHT BEATS ELECTRIC OR GAS

BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 35 leading universities and found to be superior to 30 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up or simple, clean, safe. Burns 94 per cent. air and 6 per cent. common kerosene (coal-oil).

The inventor, T. V. Johnson, 675 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$50 to \$500 per month.

Edgar Founded Half Holiday

The Saturday afternoon holiday for workers dates from the days of the Anglo-Saxons. King Edgar, in the tenth century, decreed that all work should cease on Saturday and not be resumed until sunrise on Monday.

A Successful Dance.

A very successful dance was given Friday night at the local dance hall, supposedly to aid the 1921 Chautauqua Fund. The music was splendid, and the dancers had plenty of room in which to trip the light fantastic. A very nice lunch was served at twelve by the ladies interested in the success of the event. The whole affair was very successful, and it is expected the final returns will show the deficit to be entirely blotted out. This was the Chautauqua year when Wm. Kelly, general merchant, made the record of selling over one hundred tickets.

Shoots at the Range.

At the last shoot at Comet Rifle Range, the following was the score, with 10 shots each
J. Straasburger 37 points
M. McKinlay 40
T. Graden Jr. 33
J. Straasburger Jr. 32
F. Straasburger 34.

30 Days to Christmas.

Skating Party.

A very enjoyable skating party was held on Thursday night last on Litzenger Lake, by a bunch of young people from town. Skating was indulged in till 10 o'clock when the party came back to town and had a very delicious lunch at the Royal Beanyery, afterward adjourning to the Freifeld Parlors, where music and dancing was the principal amusement for a short time.

Kennedy's Meetings.

Assemblyman Washburn and D M Kennedy, M.P. for West Edmonton, will hold meetings at the following places:

Tomahawk—
Nov. 27, 8 p.m.

Duffield—
November 28, 2 p.m.

Keep Hills—
Tuesday, Nov. 28, 8 p.m.

Stony Plain—
Wed., Nov. 29, 8 p.m.

Woodbend—
Thurs. 30, at 2.

Spruce Grove—
Thursday, 30, at 8.

Winterburn—
Friday, Dec. 1st, at 2.

Dr Max Mecklenburg, eye specialist, will be at the Royal Hotel, Stony Plain, Friday and Saturday, November 24 and 25.

Stony Plain and District

Mr. Smith, of Bruderheim, is the new, tonorial artist at the Miller Pool Hall, and is getting quite a patronage.

Stony Plain. Lit. had another successful meet on Monday night, when a varied program was gone thru by the members.

Christmas Greeting Cards—good assortment, reasonable price. Stony Plain Pharmacy.

Meredith Bros. shipped a mixed car of stock on Friday last.

Gus Zucht—Beef, fore quarters 1 cent.

Farmers are welcoming the advent of snow, a sleighing means for hauling bigger loads.

From the beginning of the new year, the Bright Bank mail will arrive in Stony on Saturdays.

Robert Winter, the Game Guardian at Heathdown, has been proving a very efficient official, he having a number of cases before Magistrate Primrose, in Edmonton, this week, for breaches of the Game Act.

Deer hunters who have gone north, say around Choway, the Game Guardian are more plentiful than big game.

Parcels and other mail matter intended for delivery in European countries by Christmas should be mailed at as early a date as possible, preferably this week, and at the very latest in time to connect with S.S. Melita, which sails from St John Dec. 9.

Dr Frith, Dentist, will be at the Royal Hotel on Saturday, Nov. 25.

Holborn News.

Mrs. Fred Williams and Master Ronald spent Friday in Edmonton.

Meredith Bros. of Golden Spike were buying hogs here this week.

Quite a number of travelers have been held up at the river this week, as the ferry is out and the ice is unsafe.

Mr John Walton took a load of bacon hogs to Stony last week which secured the 10 p.c. premium.

Quite a number of the local dancers took in the dance at Stony Friday night, and had the usual good time.

Several of our farmers are getting a good supply of good clean dry straw piled up in their barnyards for their milk cows. Acourse it is dry feed, but what can you expect in a dry country.

Mr and Mrs Vogt, pioneers of this district, but now of Strathcona, spent the weekend with Mr and Mrs Aug Burger.

Larson Bros. have finished their sawing contract. A bunch of unbranded logs which had been cut several years ago furnished argument for some time owing to the fact that three parties laid claim to them; consequently, they are, as yet, uncut.

Mr T Scott spent Sunday with Mr John Berry.

Mr R Kincart made a flying visit thru Holborn district on Sunday last.

The meeting last week of those interested in the series
